

Warren MacDonald

Speaker Details

Warren Macdonald's life's boundaries were redefined in April 1997 with his accident on North Queensland's Hichinbrook Island. Climbing to the Island's tallest peak, he became trapped beneath a one-ton slab boulder in a freak rock fall. Two days later he was rescued, only to undergo the amputation of both legs at mid thigh.

Just ten months later, he climbed Tasmania's Cradle Mountain using a modified wheelchair and the seat of his pants.

In February 2003, he became the first double above-knee amputee to reach the summit of Africa's tallest peak, Mt. Kilimanjaro.

Warren authored a best selling book, *A Test of Will*, and has appeared on *Larry King Live*, *Oprah*, and *The Hour*.

He lives in the Columba Valley in BC with his partner, Margo Talbot.

The Perception Choice

If we can't see where it is we need to go, what are our chances of getting there? If your team or your members can't see where you're going, what are the chances they will get on board?

In navigating change, and overcoming the challenges that come with it, we need to address the foundation; the root cause of why we often get stuck or disengaged, and that is, how we perceive change in the first place.

This keynote is designed to hit "reset" on how your team sees their role in your organization. Expect to come away empowered, engaged, inspired, and ready to take action. Prepare to see challenges and opportunities with fresh perspectives and renewed vision.
